

THE FUTURE IS YOURS. WE HAVE THE PERSPECTIVES.

Technical Consultant (Cloud and Virtualization) (m/w/d)

Most people live in the present. But a handful of us live in a world that doesn't exist yet — the world of Five Years Out. Five Years Out is the tangible future. And it's a way of thinking at Arrow that serves as a springboard for innovators, helping them see what's coming and stay ahead of what's ahead.

We are much more than products and services. We're a community of designers, engineers, builders and visionaries who navigate the path between possibility and practicality, across the complete lifecycle of electronics, in some of the fastest-growing commercial and industrial markets on the planet.

The work we do is everywhere, from things you've never seen to things you can't live without. A Fortune 113 company with more than 18,800 employees in over 80 countries, and 2017 sales of \$26.6 billion, we guide innovation forward for the world's leading technologies used in homes, businesses and daily life. If it takes a charge, chances are we helped design it, build it and get it to market.

Are you Five Years Out? Then chances are, you'll enjoy working with us.

Technical Consultant (Cloud and Virtualization) (m/w/d)

at Arrow is typically involved in:

- > Helping customers in Pre Sales and Post Sales activities
- > Technical advice and support for our customers
